

Kender Energy Inc. (Pink Sheets: KNDR) Releases the First Video of the Prototype of the Kender Solar Engine

Kender Energy Inc. (Pink Sheets: KNDR), announces the release of the first video of the Kender Solar Engine. Kender Energy Inc. has developed its first prototype of a "solar" engine, powered by the sun's energy. Kender has developed a new solar technology, where the thermal and photon energy of the sun are used together to spin helium in a closed circuit.

This video is available on the Website of Kender Energy Inc. at www.kendersolar.com under the "technology" section. The video has also been made available on YouTube (www.youtube.com), where the video can be seen using with the key words "solar" and "helium".

In parallel, Kender Energy plans to begin to implement a long term new investor communications and awareness program over the coming weeks designed to build a larger audience around the Company's stock. The Company feels strongly that it is at the threshold of significant business developments, and that its KNDR stock is a tremendous value-based investment that most investors are currently unaware of. Kender Energy feels that its stock will be particularly attractive to those investors seeking to capitalize on the surging sectors of solar energy.

About Kender Energy Inc.:

Kender Energy Inc. (Pink Sheets: KNDR) is a development phase company active in the field of solar energy. Its present prototypes of solar panels engine are being developed into a full-scale solar energy production system. The particularity of the Kender solar panel system and technology is to allow, via a closed circuit of gas (usually helium), to create a heat exchange with the sun and the air from the environment. The exchange generates the spinning of the helium gas in the closed circuit, propelling a turbine, which produces electricity in a 100% clean and renewable process. The system's main advantages are that it is efficient, cheap in production, and modular. The company is based near Geneva, Switzerland. Its Website is www.kendersolar.com.

Safe Harbor Statement :

Certain Statements in this press release constitute "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995. Such forward-looking statements involve known and unknown risks, uncertainties and other factors which may cause the actual results, performance or achievements of the company to be materially different from any future results, performances or achievements expressed or implied by such forward-looking statements. The forward-looking statements are subject to risks and uncertainties including, without limitation, changes in levels of competition, possible loss of customers, and the company's ability to attract and retain key personnel.
